Camaman-an, Cagayan de Oro City

PROFESSIONAL SUMMARY

Results-driven Software Developer and Cum Laude graduate with hands-on experience building scalable, production-grade applications across Android, microservices, and full-stack web platforms. Skilled in Java, Spring Boot, Vue.js, and event-driven architectures, with a proven record of delivering secure payment and digital wallet systems.

TECHNICAL SKILLS

Languages: Java, Dart, Python, JavaScript, SQL, Kotlin

Frameworks & Libraries: Spring Boot, Flask, Flutter, Vue.js, Android SDK

Architecture & Messaging: Microservices, RESTful APIs, Apache Kafka, Event-Driven Design

Databases: MySQL

DevOps & Tools: Docker, Git

Testing: JUnit, Mockito, Cypress

WORK EXPERIENCE

Software Developer**August 2024 – June 2026**

Apollotech Software Corporation

- Collaborated with cross-functional teams to design and develop software applications aligned with business requirements, accelerating feature delivery.
- Engineered, debugged, and optimized application code, and led system analysis, documentation, and testing to ensure high-quality, reliable software.
- Spearheaded the adoption of new technologies and engineering best practices, improving development efficiency across the team.

Software Developer Intern**February 2024 – May 2024**

Apollotech Software Corporation

- Enhanced frontend and backend components of WorkConnect, an infrastructure dashboard that monitors store availability and surfaces offline locations in real time.

PROJECTS

Asenso Mobile Banking App**Apollotech Software Corporation**

- Built and maintained the Asenso mobile banking application in Flutter, delivering a responsive, cross-platform experience on a modular, scalable architecture.
- Diagnosed and resolved backend defects in Python (Flask) services, improving API stability and reliability.

Card Terminal Software**Apollotech Software Corporation**

- Developed and maintained an Android-based application powering card terminal payment systems.
- Integrated QR code payment functionality, expanding supported transaction options for end users.
- Partnered with hardware and backend teams to implement secure payment protocols and optimize reliability.

Digital Wallet & Loyalty Platform**Apollotech Software Corporation**

- Designed and implemented core modules of a microservices-based digital wallet and loyalty platform using Vue.js, Spring Boot, and MySQL, enabling secure fund transfers and rewards management.
- Built and deployed RESTful APIs for account management, redemption, and transaction processing within a containerized Docker environment.
- Implemented Apache Kafka for event-driven communication between microservices, improving scalability and system responsiveness.
- Authored comprehensive unit, integration, and end-to-end tests with JUnit, Mockito, and Cypress, strengthening code quality and release confidence.

EDUCATION

Bachelor of Science in Information Technology**2020 – 2024**

University of Science and Technology of Southern Philippines, Cagayan de Oro City

- Graduated Cum Laude — Latin Honor Awardee.

AWARDS & RECOGNITION

- Best in Capstone — "Computer Vision and Artificial Intelligence Based Coffee Bean Sorting Machine."
- TOPCIT Awardee · Top 15, Code Green National Competition.
